eQuarantine Pass Android Application

Description:

An Android Application for requesting a scheduled quarantine pass for the residents of specific LGU system users. Simply register by filling-up the forms and direct login, the user now can request and get their generated Q.R. Code that will serve as electronic quarantine pass.

To install the eQuarantine Pass App to your mobile device, a downloadable **APK or link** will be available at the LGU official website or by request thru your respective Baranggay Application Administrators' email address and official social media messaging account/page like FB Msgr, WhatsApp, Instagraam, Viber and the likes.

FAQ

What personal data we collect and why we collect it?

The admin collects home addresses, family members, and destination, time and reason to go out for the present day. The admin needs the information of the user that are going out of their homes for ease of contact tracing in case of occurrence of COVID-19 positive person within an area/ sitio/ compound/ street or baranggay.

Who can see your personal data?

The admin and authorized person will be the only person to see your data.

Does the Q.R. Code have an expiry date?

Yes, after 24hrs your Q.R. code will be expired and will not be read by the scanner anymore.

Do we need to register again to access the app to get a quarantine pass?

No, you don't need to register again. You just need to login the given username and password whenever you need to get a Q.R. code for electronic quarantine pass.

What to do… if someone forgot his/her username and/or password?

Contact your barangay post / admin or go to your barangay hall.

Can we change our username and/or password?

No, the android application don't have a feature of changing or requesting for new username or password. a

Can we use screen names or any deceive information for our identity?

No, your data will be send and checked by the admin. You will not get your quarantine pass if there will be misleading information on the requirements/data that has been sent.

Does this application can run to IOS?

No, this application is built for android application only.

If the application did not work on our android devices, what will be the alternative?

Open your browser and type http://pyloninternationals.com/. It has the same content, structure and rules as the application.
